

## B-82LS Converter GM 4L80-E

B-82LS Converters are now available. We have a limited supply of B-82LS converters available as a replacement for the B-81. The B-81 converter for the GM 4L80-E transmission has been in extremely short supply.

DACCO B-81 CAN BE REPLACED WITH THE B-82LS

DACCO B-82LS IS IDENTIFIED WITH A METAL STAMP

The B-81 has a very high "junk-out" rate. We have reduced the stall speed and made other internal modifications to the B-82 converter to be the same approximate stall speed of the B-81. This unit is an acceptable replacement for all applications using the B-81 converter. B-81 or B-82 single or dual stator converter cores will be accepted in exchange.

All 4L80 Converters Remanufactured by Dacco Receive Carbon Filled Friction Material to be Compatible with Early and Late Applications.
